

# COMMISSIONING

FPSO / FSO / FSU / FSRU

We provide qualified and experienced engineers, senior technicians and technicians to the marine, offshore, oil & gas and land-based industries.

This includes new build projects, refits, conversions, start-up's, general electrical / instrumentation commissioning and for ongoing maintenance of FPSO's, FSO's, FSU's and FSRU's, Drilling / Production Platforms, LNG vessels and plants.

We are able to provide specialist commissioning test equipment, including Hart Communicators, SFC Communicators, Brain Terminals, Pressure Calibrators, Temperature Calibrators, Loop Calibrators, Volt Calibrators, Digital

Multimeters, Megger Testers, Phase Rotation Meters, Flame Detector Testers and various other types of test equipment.

Our technical staff are qualified in the fields of:-

- Project Managers
- Electrical
- Electronics
- Instrumentation
- Mechanical
- Hydraulics
- Telecoms
- Boardman
- Quality Assurance
- Document Controllers

Having completed numerous projects, our staff are familiar with the documentation procedures and safety policies.

We have a proven track record for the provision of technical manpower, and have successfully completed major conversion projects for clients such as Single Buoy Moorings, Saipem (ENI), Fred Olsen Offshore, BW Offshore and Drydocks World - Dubai.

These projects include FSO's, FSU's, FSRU's, FPSO's, Production Platforms, Petro-chemical Plants and Refineries both in the UAE and abroad.
