

TORQUE WRENCH CALIBRATION

Torque wrenches are among the most expensive hand tools on-board your vessel. It is important to have reliable and accurate torque wrenches to properly tighten bolts & nuts to manufacturer's specifications.

Ocean Automation Solutions carry out the testing, repair, calibration and certification of torque wrenches.

Types of torque wrenches that we are able to calibrate:-

- Slipper type torque wrench
- Beam type torque wrench
- Deflecting beam type torque wrench
- Click type torque wrench
- "No-hub" torque wrench
- Electronic torque wrench
- Programmable electronic torque / angle wrench
- Mechatronic torque wrench
