

# PRODUCT DATASHEET

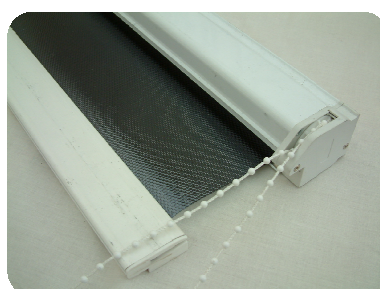

## ECLIPSE BLACKOUT SCREENS FOR NON NAVIGATIONAL WINDOWS

**Eclipse™** screens provide complete blackout from the sun's rays and are ideal for accommodation and aft areas of your vessel or rig (crew and passenger cabins). They reduce glare and solar energy by 100%, completely eliminating UV radiation. The blackout material is fully flame retardant and available in a series of colours to match any interior. All profiles are white powder coated - available with or without side channels.

Eclipse™ screens are not suitable for Navigational windows

**FLAME RETARDANT MATERIAL**  
**PROTECTIVE ALUMINIUM CASSETTE**  
**AESTHETIC APPEARANCE**  
**SIDE CHAIN OPERATION**  
**EASY TO INSTALL**  
**WHITE POWDER COATED PROFILES**

SOLAR ENGINEERING PARAMETER	% B/O Fabric
Solar Energy Rejected – % of the sun's energy that is rejected by the glazing system	100
Glare reduction – % reduction in visible light passing through the glazing system	100
Visible Light Transmission – % of visible light that passes through the glazing system	100
UV Light Transmission – % of UV light that is transmitted by the glazing system	100
